

iFoiler Cadet™ Portable Induction Sealer

State-of-the-Art, Powerful, and Compact.

NEW iFoiler Cadet™ Portable Induction Sealer

- Waterless lightweight compact digital design power converter
 - 14" x 10" x 5.5" (355mm x 254mm x 140mm)
 - 17.9 lbs. (8.12 kg)
- Portable, easy to use and maximum efficiency for consistent sealing
- 120V-240V single phase operation
- Seals virtually all cap designs
- Two Coil designs seal cap sizes from 10-70mm and 63-120mm
- Microprocessor controlled
- Membrane control panel
- Full adjustment of time from 0-10 seconds in .1 second increments
- Full adjustment of output to 100%

► High Performance

The **Cadet's** high level of performance is a result of world-class electronic engineering. It delivers highly-reliable, tamper-evident seals that prevent leakage and ensures high seal integrity for a wide range of products.

► Application-Focused

The Cadet's powerful sealing capacity make it ideal for sealing applications in food, beverage, pharmaceuticals, cosmetics, automotive, agricultural and chemical products. The Cadet is well-suited for manual or hand-held production for start-up operations, R&D work, and small volume runs. It also features an operator-friendly display.

► Sustainable

The **iFoiler Cadet's** digital technology decreases internal components, reduces energy consumption and lessens the overall footprint and weight of the machine, ultimately lowering the cost of ownership while proving our commitment to a greener, more sustainable future.

Looking for the most adaptable, versatile and universal Induction Cap Sealing technology? Contact your ITW Pillar Technologies Distributor for more information on the **iFoiler Cadet™**, the next generation in induction cap sealing technology.
